Dhaki

Smart and Secure Private Environments

Your Office Should Think For You

Dhaki Private Workspaces — A workspace that understands how you operate and adjusts in real time.

The Hidden Cost of Traditional Offices

Most offices run on legacy logic — switches, schedules, and manual controls. The result is wasted energy, constant friction, and environments that slow your team down.

Wasted Energy

Lights and climate running in empty spaces all day

Manual Friction

Constant adjustments to lights, temperature, and meeting setups

Poor Lighting

Static conditions that ignore time of day and task type

Disconnected Systems

Devices that don't communicate with each other

These problems are invisible on the surface — but they impact performance every single day.

From Automation to Intelligence

Most providers stop at automation. Dhaki goes further.

Conventional Automation	Dhaki Intelligence
Trigger-based rules	Context-aware decisions
Manual input required	Self-adjusting
Static schedules	Adaptive behavior
Device-focused	Experience-focused
Vendor lock-in	Flexible, privacy-first

What Your Office Becomes

A workspace that responds to real conditions — not just timers and buttons.

1 — **On Arrival**

An employee walks in. Lights turn on at the right intensity. Temperature adjusts. The space is ready — without a single button press.

2 — **During the Workday**

The environment continuously adapts to occupancy, natural light, and the rhythm of the team.

3 — **Before a Meeting**

The room prepares itself. Lighting shifts. Screens activate. Seamless transitions — every time.

4 **End of Day**

Unoccupied zones shut down automatically. Nothing wasted.

Six Pillars of a Smarter Office

Intelligent Lighting

Presence-aware, adaptive brightness and color temperature. Scene-based environments for focus, meetings, and relaxation.

Climate Control

Zone-based temperature management driven by real occupancy. Comfort where people are, savings everywhere else.

Meeting Room Automation

Instant environment setup. Seamless transitions. Optional calendar integration for zero-touch scheduling.

Presence Intelligence

True human presence detection — not just motion. Enables nuanced, accurate automation that reacts to real occupancy.

Energy Optimization

Smart shutdown of unused areas. Reduce unnecessary consumption without manual intervention.

Security Awareness

Monitor unusual activity patterns. Optional integration with Dhaki's private digital security systems.

Built for Control.
Designed for Privacy.

This is not experimental technology. It is engineered for the demands of modern business.

Local-First Architecture

No unnecessary cloud dependency. Your data stays yours.

No Vendor Lock-in

Flexible systems that support Apple, Google, and more.

Reliable Infrastructure

Engineered for daily use, not experimental setups.

Privacy by Design

Security integrated at every layer of the system.

Designed for Businesses That Value Excellence

Productivity-Driven Teams

Offices where environment directly impacts focus and performance.

Operations-Conscious Leaders

Businesses looking to reduce energy waste and overhead.

Forward-Thinking Companies

Organizations ready to invest in the future of work.

Premium Workspace Owners

Boutique offices and co-working spaces seeking a distinctive edge.

How We Design Your Office

1

2

01 — Understand

We analyze how your office actually operates — workflow patterns, occupancy rhythms, current inefficiencies.

02 — Design

We create a system architecture tailored to your environment and team. No generic solutions.

3

4

03 — Implement

We deploy and configure everything seamlessly, with minimal disruption to daily operations.

04 — Refine

We optimize based on real usage, ensuring the system improves over time as your team evolves.

The Real Advantage

A smart office is not about technology.

It is about creating the conditions for your team to do their best work — every single day.

Dhaki Smart Offices are designed to think for your team, adapt to your workflow, and optimize your environment — continuously.

**We do not install generic solutions. We design environments that last.**

Better Focus

Environments calibrated for deep work and concentration, reducing cognitive friction throughout the day.

Better Performance

Optimized conditions across the organization — from individual desks to boardrooms.

Better Experience

A workspace that feels effortless, premium, and alive — every day your team walks in.

Let's Design Your Office

We start with a **complimentary environment analysis** — no commitment required.

01

Analyze

We analyze your current office environment in detail.

02

Identify

We identify inefficiencies and opportunities unique to your space.

03

Design

We design a system tailored precisely to your needs.

04

Propose

We present a clear proposal with expected outcomes and ROI.
